

PATIENT CHARTER OF RIGHTS

The Manitoba Chiropractors Association and its members endorse patient-centered practice that emphasizes collaboration between the patient and the chiropractor.

Chiropractic patients in Manitoba have the right and expectation to:

- 1. Be treated with courtesy, dignity and respect.**
- 2. Receive chiropractic care:**
 - Without discrimination, and based solely on their health condition;
 - With options that are presented to the patient based on their personal goals. Care options may include treatment plans of varying duration;
 - With individualized treatment plans that evolve and change with the patient's progress based on ongoing assessments;
 - That is explained to them in terms they can understand including how it will contribute to their health goals;
 - With respectful and honest communication and without any additional conditions such as attendance at educational workshops, or participation of other family members.

- 3. Have financial terms clearly explained to them prior to any service being provided. In particular:**
 - Patients have the right to pay for individual treatments at the time of service;
 - Patients have the right to accept, reject or discontinue care at any time without penalty or conditions;
 - Patients may request and must receive, in a timely manner, an itemized detailed statement which explains the charges and services rendered. Doctors of Chiropractic are primary contact health care providers. They apply their education, knowledge, diagnostic skill, and clinical judgment necessary to determine appropriate chiropractic care and management.
- 4. Participate in discussions and decisions with their chiropractor regarding their chiropractic care.**
- 5. Receive clear information from their care provider about:**
 - Their diagnosis, prognosis and the proposed treatment plan;
 - Other options for care including referral to other health care providers or other chiropractors, if appropriate;
 - Any significant risks associated with the proposed treatment.

- 6. Know the identity and professional status of any individual providing care to them.**
- 7. Consult with, or seek care from, any other health care practitioner, including another chiropractor.**
- 8. Have reasonable access to their treatment records.**
- 9. Have their personal and health information protected from disclosure and know, with assurance, that their chiropractor and the office staff will comply with all provincial and federal privacy and health information legislation.**
- 10. Decline participation in any research project, clinical training program or data gathering process.**

Your chiropractor can answer any questions you have about your rights and expectations as a patient. You may also contact the Manitoba Chiropractors Association at info@mbchiro.org.
